

Marshall Canyon Linear Park

LA VERNE, CALIFORNIA

Design of an active neighborhood and passive linear park coinciding with the development of the Marshall Canyon Estates residential community. Active park facilities include tennis courts, a tot lot, an open play turf field and selected picnic areas set amongst the native oaks. Planned trails for the linear park follow an ephemeral stream past stands of native riparian vegetation and groves of mature coast live oaks, ultimately connecting with trails providing access to both Marshall Canyon Regional Park and the Angeles National Forest. Native trees requiring transplantation were relocated on-site within the designated park.
